

Demand Truth

Dear Friends,
American Christians must not forget that much of the opposition to returning a responsible and *godly morality* to government comes from long-term establishment members of the Republican political party! I have more contempt for those cowards who attempt to hide behind a veil of conservatism than I do for the liberal-left Statist who do not hide their goals and objectives!

I have often said that, "***Liberalism is a lie and Liberals are liars!***" That is simply an inescapable truism – Because the tenets of liberalism are untrue, those who profess it quite literally must perpetrate the lie!

Well, it must not be not be forgotten that to the majority of those whom are, "*Career Politicians*" – whether they are Democrat or Republican – ***lying*** is just a part of their culture too! In fact, I am sure that many do not even view it as a *flaw* in their character but rather just a form of expedience in accomplishing what *they know* will be good for us. (Something we would actually support - if we were only as smart as they are!)

In the early 1800's, Alexis de Tocqueville, a French historian and political thinker, came to America to try to determine "*why*" this '*new*' nation and its '*new*' form of government, was so very successful. As a result of his pursuit, he subsequently authored a book: "***Democracy in America,***" **1831.**

One of the most compelling conclusions he wrote about in his book was that, "**America was great, because America was good!**" He wrote that he had observed the **Christian religion** in the pulpit, in the marketplace, in the public square and most significantly – in the government!

America was not a theocracy – but – the people of America did "**Live**" their Christian beliefs – and - as a result, it was the always-present moderating-factor guiding the American people who served in, politics, government, business, and the entire culture-at-large!

As Americans in 2011, we do not have to wonder "how" and "why" the America conceived by our Founding Fathers was so incredibly successful! It is not necessary for Americans to try to discover what "works" and what does not "work!"

History is there to observe! History does not lie! History is Truth!

Christians of America I challenge you: "Know God's Truth and know America's Truth and demand them both!"

Robert
