

## The Real Truth of this War!

The entire nation of Islam desires to kill us and destroy Capitalism and our way-of-life – us killing a singular individual Muslim “Nut-cake” becomes insignificant if the liberal-left can ever come to understand that truism!

In war – “victory” – (true victory) – can only be realized when the enemy is absolutely and completely ***DEFEATED*** and made to be completely subordinate and helpless and powerless to make ANY further aggression!

When we attempt to contemplate or measure the extent of the infection of “*Politically-Correct*” thinking in our contemporary culture-at-large today – we cannot be so naive as to think that this altered perspective has not reached into even those sectors we might otherwise believe would be immune – i.e. our “Military” and the “Political Powers” which direct them!

We quite necessarily must go all the way back to WWII to be able to view the “*correct*” application of the complete destructive objectives of that which is: **“WAR!”**

True War is ***NOT*** just singularly targeting only purely “Military” objectives. An enemy consists, and is comprised of, a **“*People*;: a “*Culture*;” a “*Political-Force*;”** that ALL collectively – come together in an effort to war against another people!

In WWII it was easy to identify and understand that Japan – the nation – was our enemy. When we were finally able to reach their nation with our bombers we dropped bombs on all of the country! In fact, there was much more devastation and destruction as a matter of the "*Fire-Bombings*" of Japan than with the two atomic bombs! The "Fire-Bomb" was designed to explode and then cause an incredible inferno! This strategy was purposely directed at military objectives yes – but it was also intended to cause incredible and severe civilian casualties too!

Why? – Simply – To break their **ability** and perhaps even more importantly, to break their **will** – to continue to fight!

The important distinction, with regard to the war we fight today is that, unlike the war with the *nation of Japan* (which had definitive geographical borders and boundaries) the ***Nation of Islam*** occupies many, many different geographic territories – but they – **AS A NATION** – must, nonetheless, be utterly destroyed and defeated - to the same extent that Japan had to be destroyed and defeated before they ultimately quit!

If we do not arrive at this understanding of the real truth – that is War – we will never be able to stop the aggressions toward us and end it!

Robert
